FIRE WEATHER

Fire weather conditions in 1979 were normal for the eastern and southeastern regions of the United States. The western part of the Nation experienced three weather patterns which influenced fire activity. West of the continental divide in the Northern and Central Rocky Mountains, below normal snowfall and light spring rains resulted in moisture conditions 25 to 50 percent below normal in June. Little moisture occurred in July causing severe fire problems. In the southwestern United States the normal July rainfall arrived late. This, coupled with an abundance of light fuel, resulted in considerable fire activity. California's wet winter and spring provided an abundance of fuels. Mid-September's Santa Anna winds in Southern California,

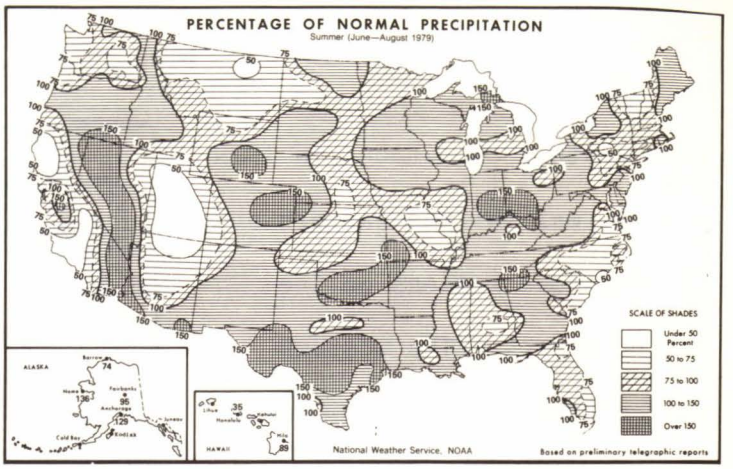
plus this fuel accumulation resulted in heavy fire activity. A light late fall fire season in the southeastern United States was ended by December rainfall.



LARGE FIRE OCCURRENCE

There were 116 Class E and larger fires that burned in 1979. Class F and G fires listed below accounted for 86 percent of the total area burned.

ATTAINMENT

In 1979, 92 percent of all fires were controlled at 10 acres or less in size on 197 million acres of Forest Service protected lands. One percent burned 300 or more acres each. In the same year, wildland fires burned 3 percent of the acres protected by the Forest Service.

COOPERATIVE EFFORTS

Interagency cooperation to increase cost-effectiveness of fire management activities continues to be emphasized by managers. Some examples of these cooperative efforts between Forest Service Units, States, counties, and other Federal agencies are:

- In the Northern Region, a Northern Region Multiagency Coordination Group (NORMAC) was formed and implemented. Agencies included the Forest Service, Bureau of Land Management, National Park Service, and the States of Idaho and Montana. This Group assesses fire situations and determines priorities for resources on project fires.

- In Colorado, two interagency Class I overhead teams were available on a 2-week alternating basis during the fire season. Seven interagency Class II overhead teams were also available. These teams were composed of Forest Service, Bureau of Land Management, National Park Service, State, and county personnel.

- In the Southwest Region, the Bureau of Land Management, Bureau of Indian Affairs and National Park Service assist in the Regional Airtanker Program. The practice of dispatching the closest unit for initial attack is well established.

- During the period of June 30 to July 2, a multiagency fire suppression coordination group was activated in the State of Arizona. This group was represented by all wildland protection agencies in the state, with the exception of the National Park Service. Also included in the group was Rural Metro Fire Department, which has contract protection responsibilities. Their objective was establishing priorities for resources where the demand exceeded the supply during the multifire situation.

- An agreement was consummated between the USDA Forest Service and the State of Utah to provide initial attack on an offset basis within Sevier County.

- The State of Nevada furnished a dispatcher to assist with the dispatching in the Regional Office, Ogden, Utah, during the Steel Creek and Mortar Creek Fires.

- The Cleveland National Forest and California Department of Forestry have recently completed construction of a joint suppression station which will be in operation in 1980.

- An agreement has recently been signed between the California Department of Forestry and the Klamath Forest for a joint dispatch center in Yreka.

- Cooperative Agreements were completed in early 1979 with Mt. Rainier and North Cascades National Parks, and the adjoining Forests, covering reciprocal and cooperative fire protection services.

- A new Cooperative Agreement with the City of Seattle Water Department, relating to fire protection and slash disposal in the Cedar River Watershed, was negotiated in 1979.

- Through the Cooperative Agreement between the Okanogan National Forest and the Colville Confederated Tribes, the Conconully Ranger District was able to utilize the Tribe's CETA Program to accomplish the numerous fuels reduction projects.

- The Superior and Chippewa National Forests in Minnesota continued to cooperate with the Bureau of Indian Affairs and State of Minnesota on joint use of airtankers and bases.
